Head Of Academics

Dear Applicants,

We are inviting to get most interesting and human profession of being a medical doctor.

Our medical school has considerable experience in training doctors for foreign and employs the best specialist of the Georgia.

Strong intellectual potential, close co-operation with the leading medical institutions, the use of modern technologies and an individual approach to each student, ensure high quality of training and future, professional achievements of our graduates.

Training in our medical school is conducted in line with up-to-date standards, applied in European countries. We are offering our students training programs, best fit for the needs of their home country or places where they want to practice medicine n the future.

We apply training techniques that make it possible for students to develop problems-solving skills, learn how to get information independently and improves abilities to assess new information critically. we are confident that wide access to clinical settings, work with patients, and participation in surgeries will help students develop good clinical skills and a human approach.

We pay particular attention to personal growth of students by applying individual approach to each of them and help them solve all their problems related to training, accommodation, privacy and security.

Once you become a student of our school, you will be a part of us as we are personally responsible for each one of you, and when you leave, we want you to remember us and stay in touch.

David Kereselidze
Head Of Academic Board
New Vision University, TBILISI

History

New Vision University Hospital was founded as a result of a reorganization in Ltd. Cancer Research Center-Martin D. Abeloff Laboratory (established on April 20, 2012) and September 2015 merger of Ltd. "Geoclinic." On September 1, 2016, managements of Hospital and the University School of Medicine joined and since then is headed by the dean of the School of Medicine.

Mission & Goal :

The hospital mission is to provide medical service based on individual needs and ethical values through implementation treatment methods of international standards. Development, implementation, and enhancement of quality of medicine practices are carried out along with educational and research programs.

The main goals of the NVU shall be.

1. Offering educational programs that promote free development of an individual: "A student creates his/her own profile". Educational programmes at NVU are oriented on supporting free choice of a student to develop desirable competencies in major field of study and to acquire an additional specialty or arrange for free concentration of the components from various programmes;
2. Promoting establishment of academic integrity standards, encouraging the research activities of the NVU academic personnel and integrating students into this process;
3. Development of the various models of the introduction of novelties.

Facts

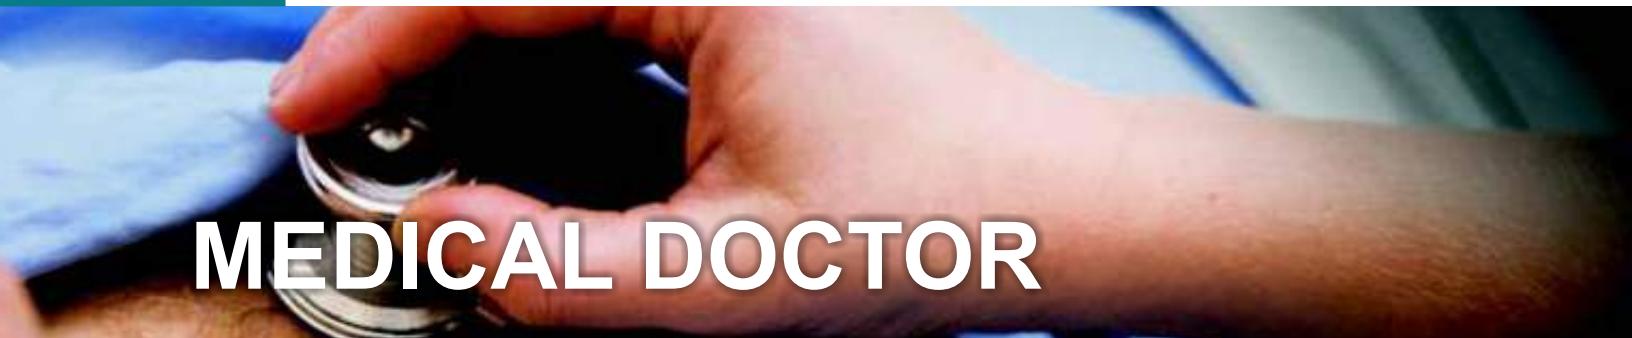

New Vision University (NVU) was established in 2013, New Vision University Hospital - in 2014.

NVU team comprises of over 400 Professors, Scholars, and Practicing Doctors.

NVU has over 1000 students coming from 25 different countries.

The NVU Advantage

A number of scientific -research projects of international and national significance have been accomplished on the university base. The university has close partnership relations with the leading higher educational institutions within and outside the country like UK Leeds University England. NVU is considered a desirable host for international scientific conferences and symposia held in various fields of science. Apart from this, the academic and scientific faculty of the university actively participates in scientific conferences and exchange programs in different countries of the world like USA, UK and other European Countries.

Medical Doctor (MD) Program

Medical Doctor educational program (360 ECTS) aims to provide medical training, predominantly in a practical environment, based on ethical values, respect for the individuals and on the premise of the minimum interference. Provisionally, the program identifies teaching phases of healthy body, diagnosis and treatment, in which utilization of vertical and horizontal integration elements makes the learning process systematic and consistent.

Results of the educational program are achieved through implementation of innovative teaching and assessment methods - problem-based learning, early-stage involvement into the biomedical research and provision of objectively structured clinical examination.

The first phase (Healthy Human Being, 120 ECTS, 1st and 2nd year) is comprised of the core modules in Life Sciences (biochemistry, molecular biology, histology) and Body Systems (anatomy, physiology) in parallel with components concentrating on teaching core values of medicine, clinical skills, research methods as well as a wide range of elective courses.

The second phase (Diagnosis, 60 ECTS, 3rd year) incorporates the study of pathological changes and disease symptoms in the body, as well as the practical comprehension of the modern principles and methods that facilitate a delivering process of diagnosis.

The third phase (Treatment, 180 ECTS, 4th-6th years) is bound to the study of the treatment of diseases and syndromes in accordance with the latest clinical care guidelines and protocols determined by the evidence-based medicine.
